-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-26 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claims are directed to a method and apparatus for multiplying two elements of a finite field.

Claims 1-7 and 20-22 are directed to a process of multiplying two elements of a finite field which is a purely mathematical algorithm, i.e. the claims fail to be limited to a practical application of the mathematical algorithm in the technological arts, note MPEP 2106.

Claims 8-19 and 23-26 are not limited to embodiments which enable the functionality of the claims to be realized. In view of the first sentence of the last paragraph on page 47 it appears that claims 8-14 and 24-26 are intended to include a software embodiment per se of the multiplier but the software embodiment per se lacks the necessary hardware to enable the functionality of the claim to be realized. Claims 15-19 and 23 recite "machine-readable medium" which appears to correspond with "computer readable medium" which is defined on page 48 as including "a network link and/or a network interface" which results in the claims reading on an embodiment wherein the hardware that is necessary to enable the functionality of the claims to be realized is lacking.
